named John Bryson, brought forth sensa-tional developments. Bryson was the business partner of Box, and the money had been left in the latter's keeping while Bryson, suffering at the time from alcoholsm, went to a ranch a few miles from town o recuperate. James Cline, a negro witness r the prosecution, testified to having been ired by defendants to put Bryson out of the way by administering poison in his whisky, under pretense of giving him medicine, but his courage failed him, and he relented and threw the bottle away; that hen defendants induced him to return to fucson and enter their house at night, take herefrom Box's pantaloons, containing Bryson's empty purse, etc., and throw them n the back yard to excite suspicion of robpery. The negro carried out the details of the scheme successfully, and says he received also for his trouble. Box and his wife were rrested at the instance of Bryson, and fterwards Cline, who, becoming frightened t the possibility of serious consequences to imself, gave the above expose of the dleged conspiracy. The Union Club and Arthur J. Capel. NEW YORK, June 18th .- There is con derable comment in club circles here over the action of the Union Club in revoking he six months' invitation to Arthur J Capel, brother of Monsignor Capel, in con quence of which the former sailed for England recently. The World has the fol owing particulars : Three weeks ago Mr Capel had been persuaded into an excess o onviviality, which did not stop with the light, but was continued over to next norning. When the afternoon came and he party separated, Capel's ill-fortune le im to make the usual visit to the club for unch. Arrived there, he lay down on

ounge in one of the public rooms and wen o sleep. Members of the club apprehend ng the expose and the unpleasantness on is condition, endeavored to arouse him nd take him quietly back to his rooms Inhappily, Capel was in such a state that e could be removed to the cab only with much difficulty. It was impossible to con eal the fact from the knowledge of the Governors, and the rules of the club com pelled them to take action. Capel sent : most profuse apology next morning, by did not, as advised to do by thoughtful and considerate friends, himself give notice that he would not feel justified in again availing himself of the courtesies of elub. In default, the Governors were forced o advise Capel that his six months' invitaion was revoked. He at once secured assage on the Normandy.

THE CITIZENS' COMMITTEE. Their Conclusions After a Careful Inves-

tigation.

Following is the report of the Citizens' ommittee as to vesterday's investigation To the Citizens' Association of the City of Sacre menuo—GENTLEMEN: Your committee appointed to investigate why there was not (as is claimed a sufficient supply or pressure of water at the time of the burning of the Phenix mill, on the morning of the 14th, beg leave to report as follows: On Tuesday, June 16th, your committee procured a water gauge, and at 2 P. M. attached it to the hydrant on Thirteenth street, between J and K. and found it to register about thirty. t to the hydrant on Thirteenth street, between and K, and found it to register about thirt ve pounds, which was afterwards confirmed hive pounds, which was afterwards confirmed as being correct by inquiry at the water works. The place where the fire originated was located, and the line of hose which was said to be in readiness and was brought into play at the time of the beginning of the fire, was given us. We found the hose and nozzle to be 51 feet in length—a 2-inch rubber hose, and attached to a 2-inch rubber that from the attached to a 2-inch stand-pipe; that from the end of nozzle to the place where the fire origi nated was about 38 feet; that with this hose and a pressure of 25 pounds a stream of water could be thrown fully 55 feet, which would have been sufficient, we think, when directed through loor opening into the room where the fire wa the door, it is said, was on a line with the fir and the hose connection), to have played on the fire. A place was indicated where the water dropped as it came from the hose at the begin-ning of the fire, and, upon measurement, found it was 21 feet distance from the end of the nozzie. From here we drove to Nineteenth street, K and L, and attached a water-gauge, and again found it to register thirty-five pounds pressure. At this point Paxton McDowell, of the hose-cart at Nincteenth and L, came to where we were, and he was asked whether or not they had got a sufficient pressure of water in the early part of the fire at the Phoenix mill, and his answer was "No." He said that his hose carriage was at A FEW MINUTES AFTER THE ALARM

Was sounded, and a hose was attached to the hydrant on Thirteenth, J and K, and there was no water to speak of. The hose-carriage was driven abound the block, and a hose was attached to the hydrant on Fourteenth street, J and K, and the hose carried down J from the corner of Fourteenth to the fire by hand, and then there was not a sufficient force of water to do good service. In answer to further inquire then there was not a sufficient force of water to do good service. In answer to further inquiry he stated that in his opinion they could have saved the mill proper if they had had an ordinary supply of water. On our return down town we stopped at No. 2's engine house, or Tenth street, and on inquiry of Mr. Heinreich engineer of Engine No. 2, was told that after arriving at the fire, which was within four of the migutes after the alerm was counded that five minutes after the alarm was sounded the made attachmens at the hydrant on Thirseentl I and J, and the water was turned on, and the pressure registered by the water-gauge wa lifteen pounds. He stated that by order of the department the engineers were required to ta the water pressure gauge. He further stat-that they DID NOT GET ALL THE WATER THEY REQUIRED,

so it seemed to him, for a half to three-quarte So it seemed to him, for a half to three-quarters of an hour, and that his engine was pumping air half the time. Mr. Ladd, driver of Engine No. 2, stated also that it was his opinion that if they could have had the regular supply of water they could have saved the mill We went on down the street to Fifth street, to the corporation house, where we met Mr O Meara, Assistant Engineer (Chief Sullivan not heing about) who said in answer to our ones. eing about), who said in answer to our que ons, that while there was not a sufficient su ply of water, as to the department's ability to save the mill after their arrival at the fire, was doubtful in his mind, claiming that the alarm to us that the testimony given there was pr dominant that there was not a sufficient suppl or pressure of water at the time of the fire, at

TANK AND DOMESTIC PRESSURE. It was arranged that the tank pressure should be turned on at 1 o'clock that day, and that fire occurred, gauge the pressure there and tes the capacity of the mill hose. The gauge wa placed on the hydrant before the time, and the Empire House. To-day a burly Irishman, also from Logan, put in an appearance, and had a conference with Sauerbier. The result of the meeting was the sale of Sauerbier's wife and baby to McFarland. The price paid was \$100. Sauerbier hung out at first and wanted more money, but McFarland refused to raise the bid. To-night ner of Thirteenth and J, and within two min

way as the engine worked up, AND FINALLY WAS COMPLETELY EXHAUSTED The stream from the engine increasing until reached about 150 feet. This test showed th

while the engine was working at a low steam pressure it offered a little resistance. The next test, which was made with both engines a to hydrants on the same main, showed conclusively that they were able to suck water fast than could be supplied, with the engines at the water works pumping with 35 pounds pressure. During this test our gauge on the hydrant ind cated only 25 pounds, while it was learned after returning to the water works that the pressure was maintained at 35 pounds. After removi the engines a test was made to see how long required to increase the pressure from 35 to pounds, and notice was given Trustee Jon who was at the water works, to put on the fir and careful timing showed that it only required ONE AND A HALF MINUTES.

This ended the tests. In coming to any definit conclusions, we find it difficult to make our selves believe other than if the engines at the without leave on a hunting expedition.
This is the first knowledge that any of the Mescaleros were off their reservation in the White Oak country.

Selves beneve other than it the engines at the water works were running with only 35 pounds pressure, that there should have been a better supply of water at the time the fire broke out than eye-witnesses state. From these tests made to-day, aside from the tests made by your committee last year, we firmly believe in and have

CONFIDENCE IN THE CAPACITY OF THE HOLLY Water works to farnish our citizens every pro-tection against conflagration. Therefore we conclude that in this instance the cause of the insufficiency of water supply is directly chargeinsufficiency of water supply is directly chargeable to some neglect or carelessness at the water
works. Your committee here recommend that
your Association take steps to and do confer
with the Superintendent of the water works, as
to the advisability of never allowing the water
pressure at the water works to fall below 35

to state that it was written in the midst of business and hurry, and ask you Association to look

This event may serve to call attention to the fact that common and long established methods of storekeeping are being revolutionized.

This modern Declaration of Independence is

AGAINST Two Prices, Discrimination,

Misrepresentation. IN FAVOR OF One Price,

Equality, Justice to All. From the start our business has been conducted

upon these latter principles, and in ways which have, and do insure, beyond doubt, the just and fair treatment of every customer. Some have even said that we go too far in this direction—that in making penny change, etc., we are over-particular. But we can only reply, that thus far all the methods introduced, for the better safety and protection of customers have not only been of benefit to customers, but of benefit to the house.

Indeed we consider our methods of business of quite as great advantage to customers as our goods and prices.

The existence of Rectal Ulcers is as old as the race, and surgeous, from time to time, have written of them, but have been unable to SEE THEM. We have instruments by which the rectum can be clearly and intelliget by examined, and without pain or danger to the patient. The invention of these instruments by Dr. A. W. BRINKERHOFF, of Upper Sandusky, Ohio, has opened wide the door to the successful treatment of this malady, and has established the fact, after examining more than twenty thousand patients suffering with all the various complaints found in chronic diseases of both sexes, that Rectal Ulceration existed in every care. With our system of treatment we cure the ulceration, if not too far advanced, and the train of symptoms and misery disappear.

The Cholera Situation.

MADRID, June 18th .- The inhabitants of there. populous quarters of the city strenuously oppose all measures taken by the municiauthorities to disinfect their dwellings The resistance of the people became so passionate and persistent that the authorries felt constrained to abandon the enorcement of all sanitary regulations which had been adopted to prevent the entry of cholera into Madrid, or limit its ravages, for interment should the disease find lodgment therein In the Cortes, last evening, the Minister of Foreign Affairs said the Government are ot yet prepared to advise that the King visit Murcia. Sagasta denied that cholera existed in Madrid, and severely arraigned the Government for asserting to the contrary, thereby doing great injury to the commerce of the Capital. Three of the four Commissioners appointed to investi-gate the subject, report that inoculation with cholera virus is so harmless that they advise that it be permitted, on the ground hat it will tend to I revent a panic.

The dis-ease is thought to have been brought in by the river and the water has infected the town. In the past twenty-four hours there have been 104 new cases and 22 deaths, and in the suburbs 53 cases and 22 deaths. Business is largely suspended. There has been a general exodus of all persons able to leave. Curious laws prevail in the city One prohibits the sale of pork and another fines all persons leaving from terror, for the benefit of the sanitary fund. The Governor of Murcia expects difficulty in assembling fine and imprison all delegates refusing to attend. FOUR ACTS PLAYED!

Report about Ex-President Arthur.

Will the Fifth and Final Act be a Tragedy. [Rochester Democrat and Chronicle.] "Dr. Lincoln, who was at the funeral' of ex-Secretary Frelinghuysen, says ex-President Arthur looked very unwell. He is suffering from Bright's disease. During the past year it has assumed a'

very aggravated form." That telegram is Act IV. of a drama written by ex-President Arthur's physicians. In Act I. he was made to appear in "Malaria." of which all the country was told when he went to Florida. In Act II. he represented a tired man, worn down, walking the sands at Old Point

Atlantic toward Europe for a longer rest.

The curtain rolls up for Act III. upon the distinguished actor affected with melancholy from bright's disease, while Act IV. discovers him with the disease "in an aggravated form, suffering intensely (which s usual), and about to take a sea voyage." Just such as this is the plot of many dramas by play-wrights of the medical proession. They write the first two or three acts with no conception of what their character will develop in the final one.

They have not the discerament for tracing in the early what the latter impersonaions will be. Not one physician in a hundred has the adequate microscopic and chemical appliances for disc vering bright's disease in its early stages, and when many do finally comprehend that their patients are dying with it, when death occurs, they

But all the same, named right or named wrong, this fearful scourge gathers them While it prevails among persons of sedentary habits—lawyers, clergymen, Congressmen—it also plays great havoc among farmers, day laborers and mechanics, ough they do not suspect it, because their physicians keep it from them, if indeed ev are able to detect it.

It sweeps thousands of women and children into untimely graves every year. The health gives way gradually, the strength is variable, the appetite fickle, the vigor gets less and less. This isn't malaria—it is the inning of kidney disease and will endwho does not know how?

No, nature has not been remiss. Independent research has given an infallible emedy for this common disorder; but of urse the bigoted physicians will not use Warner's safe cure, because it is a private affair and cuts up their practice by restoring the health of those who have been inalids for years.

The new saying of "how common bright's disease is becoming among prominent nen!" is getting old, and as the Englishman would say, sounds "stupid"—especially "stupid," since the disease is readily detected by the more learned men and specialists of this disease. But the "common run" of physicians, not detect-ing it, give the patient Epsom salts or other drugs prescribed by the old code of treatnent under which their grandfathers and great-grandfathers practiced!

Anon, we hear that the patient is "com fortable." But ere long, may be, they county, is 1,177.

The thermometer has touched 113° at and again the "comfortable" story is told. orture him rather than allow him to use Warner's safe cure? With such variations the doctors play upon the unfortunate un-until his shroud is made, when we learn that he died from heart disease, pyremia, septicremia or some other decep-tive though "dignified cause."

Ex-President Arthur's case is not singular—it is typical of every such case. "He is suffering intensely." This is not unusual. Generally there is almost no suffering. He may recover, if he will act independently of his physicians. The agency named has cured thousands of persons even in the extreme cases-is to-day the mainstay of the health of hundreds of housands. It is an unfortunate fact that hysicians will not admit there is any viroutside their own sphere, but as each chool denies virtue to all others, the peoe act on their own judgment and accept ngs by the record of merit they make. The facts are cause for alarm, but there abundant hope in prompt and independ-

HVVE THOUSAND COPIES OF THE "HOME SEEKER" were published last month and placed in the bands of those coming into the State in search of homes. Our agent at Ogden goes into the cars and places a copy in the hands of each head of a fall by and single person. The "HOME SEEKER" is the best advertising medium ever offered to those who wish to extend their business to new settlers. To hotel men and real estate a conts it is invaluable. An advertisement in an ordinary publiable. An advertisement in an bridnary publication, promiscuously distributed, does not meet with more than one customer out of every hundred people which it reaches. The "HOME SEEKER" is distributed only to those who are coming here with a desire of buying immediately. Not a single copy is wasted. We have received a solid support from the business community of the northern halt of the State. The munity of the northern halt of the State. The continuous publication of the 'HOMESEEKER', is an assured fact. More land can be sold by an advertisement with us than any other way known. We shall make the "HOMESEEKER" subserve the best interests of the northern half of the State. It is issued to promote immigration and to locate the settlers in the northern counties.
